

Message from IAIM Educational Coordinator

Dear members of IAIM,

Our Organization is growing at every second, and this growth gives us the opportunity to think of new ways to reach members. This year, with more information, and more chances to get to know what is being done in the World of Infant Massage, it is with great pleasure that I talk to you about what is new in the next Educational Conference.

Our Founder has been in contact with many members through her writing, but what good news it is to be able to see her in person!! So many CIMIs following Vimala's vision throughout the World, and now they get the chance to really learn from her words and feelings, during her presentation and workshop. How good is that!?

Paper Submissions are also something that became a reality to this next Educational Conference, and goes along with the growth of IAIM. Our Organization has a very clear Mission, and it speaks about Education in a very important point of view. Education is in everything we do and get from IAIM: we learn from babies, parents, families, but also with the latest research, and shared experience. This is why it is so important to have this moment, where CIMIs around the world have the opportunity to share their rich experience in the field, as well as new projects and academic research. The Scientific Committee is very impressed with all the Submissions and the results are coming soon. There is still time for submission of Posters as the deadline (exclusively for posters) has been extended until the 21st of February 2016. Our Committee has proposed a range of possible lines of work such as: parental classes, new projects, work tools and relevant research.

Over the next months we will give you regular updates about the Conference and its Program. The hosting committee will do their best to make this one of the best Conferences of IAIM.

See you in Paris!

Lúcia Bragança Paulino

IAIM Board

Educational Coordinator
